Text here about components. This section will need to be quite long to take up the right amount of space. Perhaps mention all items or give a breakdown of relative importance and recent growth data. Also try to capture the importance on some items, such as housing and medical care. Most of the inflation is coming from housing. More text here.

More text here. Possibly mention process for identifying contributions to the all items total. Another option is to discuss why housing inflation isn't eased through higher interest rates. Probably could mention volatility of food and energy or overall story related to inflation.

## Consumer Price Index

contribution to annual growth, percentage points
